

## Getting Started Is Simple

Schedule your **first consultation** and we'll walk you through everything step-by-step. After reviewing your goals and health needs, we'll create a customized NAD<sup>+</sup> therapy plan **designed just for you**. Then you can begin treatment and start your **journey toward better energy, clarity, and overall vitality**.

# NAD<sup>+</sup> THERAPY

**VITALITY. MENTAL CLARITY.  
HEALTHY AGING.**

REPLENISH WHAT TIME CAN  
DEplete—SUPPORTING YOUR  
BODY FROM THE CELLULAR  
LEVEL UP.

## FAQS

### Is NAD<sup>+</sup> therapy safe?

NAD<sup>+</sup> is a compound your body naturally uses every day. Most people tolerate therapy well.

### What does it feel like?

Many clients report improved energy, focus, and mental clarity—often after a few sessions.

### How many sessions will I need?

Some notice benefits after one visit. For longer-lasting support, a series of treatments may be recommended.

### Are there side effects?

Some patients experience nausea, headache, or a warm sensation during the infusion—these are temporary.

# WHAT IS NAD+?

**NAD+** is an essential coenzyme your cells rely on for energy, DNA repair, and overall brain and physical function.

Levels decrease dramatically with age, which may lead to fatigue, brain fog, slower metabolism, and signs of aging. NAD+ therapy helps replenish what your body loses over time.

## WHY NAD+ THERAPY?

### ⚡ Renewed Energy & Mental Clarity

- Supports natural cellular energy to help you feel less fatigued
- Improves focus, memory, and overall mental sharpness

### ⚡ Support Healthy Aging

- Supports the body's natural repair processes and cell regeneration
- Promote healthier skin and support long-term organ function

### ⚡ Detox & Immune Support

- Helps the body manage oxidative stress and support detox pathways
- Supports immune function and overall cellular protection

## HOW IS NAD+ GIVEN?

**IV Infusions:** Delivers NAD+ directly into circulation for efficient absorption and quicker effects

**Injectable Therapy:** Typically used in smaller, ongoing doses to help maintain NAD+ levels

**Pills or Sublinguals:** Designed for daily support, though absorption is lower compared to IV or injections

Treatment length and dosing are customized based on your wellness goals and medical history.
