STERILITY TEST (BATCH & SIZE COMPLIANCE)		USP 71 COMPLIANT		METHOD SUITABILITY ON FILE	No

Samples accepted by Pharmetric Lab are assumed to be prepared by the customer within the guidelines of USP <71> regarding sample size and number of units sampled. Pharmetric conducts sterility testing using bioluminescence technology. Per USP <797> "A method not described in the USP may be used if verification results demonstrate that the alternative method is at least effective and reliable as the USP membrane filtration method as described in USP<71>." Sterility Testing performed by Pharmetric Lab using bioluminescence technology was validated as equal to compendial test by direct comparison. Validation documents are on file at Pharmetric Lab, LLC.

TEST DATE refers to start date. Please note some tests are carried out over multiple days.

The results on this CoA relate only to the item(s) tested and apply to the sample as received. This Report shall not be reproduced except in full without approval of the laboratory.
