

Lipo-MICCC

(Methionine, Inositol, Choline, Cyanocobalamin, and sometimes additional B vitamins)

Formulation & Dosage

- **Route:** Intramuscular (IM) injection
- **Typical Dosage:** 1 mL weekly
- **Common Concentrations:**
 - **Methionine:** 25 mg
 - **Inositol:** 25 mg
 - **Choline:** 25 mg
 - **Carnitine** 25 mg
 - **Cyanocobalamin (Vitamin B12):** 1 mg

Mechanism of Action

Lipo-MICCC combines lipotropic agents and B vitamins to:

- **Promote fat metabolism and mobilization**
- **Support liver detoxification**
- **Enhance energy production and cellular function**

Each component plays a unique role:

- **Methionine:** Sulfur-containing amino acid that aids in fat breakdown and detoxification
- **Inositol:** Facilitates fat transport and nerve signaling
- **Choline:** Essential for liver function and fat emulsification
- **Cyanocobalamin:** Supports red blood cell production and neurological health³

Indications

- **Adjunct in weight loss programs**
- **Support for metabolic health**
- **Energy enhancement**
- **Liver support and detoxification**

Contraindications

- Hypersensitivity to any component
- Liver disease (may impair metabolism)
- Acidosis (can be worsened by methionine)
- Leber's disease (risk with cyanocobalamin)

Precautions

- Use caution in pregnant or breastfeeding individuals
- Monitor in patients with thyroid disorders, kidney dysfunction, or metabolic conditions

Adverse Effects

- Mild pain or redness at injection site
- Flushing, nausea, or dizziness
- Rare allergic reactions
- Potential toxicity in hepatic impairment³

Storage

- Store refrigerated
- Protect from light
- Shake well before use (if instructed)
